DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-52, drawn to a process for fabricating membrane-substrate structures, classified in class 216, subclass 2.
- II. Claims 53 and 54, drawn to a monolithic membrane-substrate structure, classified in class 428, subclass 156.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed in Group II can be made by another and materially different process without the steps of the Group I process, i.e. depositing a sacrificial layer, removing the sacrificial layer, forming an air gap between the layer of polymeric material and the substrate by release of the layer of polymeric material from the sacrificial layer upon removal of the sacrificial layer etc.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Ross Schmitt on 11/21/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1772

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
